Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Catherine Bell on 9/6/2006.

In the claims:

In claim 34, line 1, after "more" insert -- aliphatic --.

In claim 44, line 6 of the text portion, change "five" to -- four --.

In claim 44, line 7 of the text portion, change "3, 4 or 5" to -- 3 or 4 --.

In claim 44, 8th line from the end, after (C₅H_{5-x}R_x) insert -- wherein x is 0, 1, 2, 3, 4 or 5; --.

In claim 44, delete the 2nd line from the end.

Comment on Examiner's Amendment

2. Applicant's amendment filed 6/30/2006 has inserted the word "alpha" in line 1 of claim 34 in an attempt to exclude styrene polymerization as described in the previously applied references. However, at page 16, line 17 of the specification, applicant appears to be including styrene within the scope of "alpha olefins." The examiner's amendment

Art Unit: 1713

herein is made to unambiguously require one or more aliphatic (i.e., non-aromatic) alpha olefins in the claimed method. Inherent support exists for describing the required alpha olefins as aliphatic because, except for a single mention of styrene, the specification recommends only monomers which are aliphatic (see pg. 16, lines 13-33; working Examples).
